The Pitch

We have identified a unique opportunity to open a **tavern-style pizza parlor with full bar**, with a focus on finger foods in an underserved area of New Orleans. While the city is home to several well-established bar districts, there remains a gap in certain neighborhoods that lack similar tavern-style establishments. Our vision is to create a **distinctive tavern that combines high-quality, approachable small plates with craft drinks in a comfortable, boutique-inspired setting**. This concept will provide both residents and visitors with a new gathering place, fostering a relaxed yet vibrant atmosphere where people can enjoy great food, drinks, and conversation.

Business Strategy:

- Target **evening diners** and the **social crowd** on weekdays.

- Cater to early **Sunday peak** efficiently.

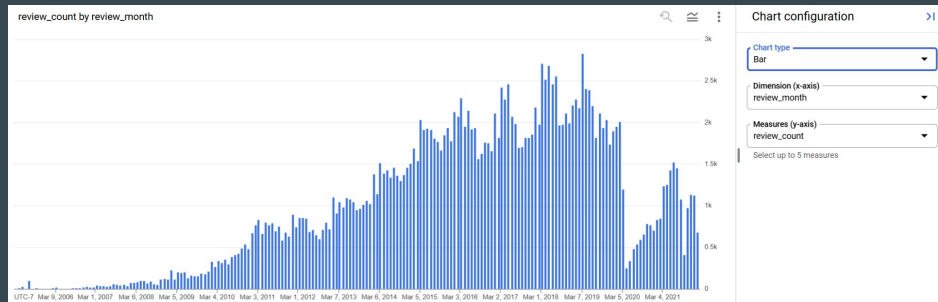

Gaining Traction

From the yelp data, we were able to determine the total number of reviews for like-restaurants per month, from 2005-2022.

When expanding our results, we can see that there is a **flux during the peak seasons** – mostly around the beginning of the year **(Mar-May)** . They also seem to pick up some around the holidays **(Oct-Dec)** .

These are the best times to collect feedback from reviews to help improve the customers' experience!

Timeline

The Launch

Soft Launch

Our suggested **soft launch** would be in **February** , sporting a **Mardi Gras** theme with matching, **limited edition drinks** – specially made for the soft opening and festival.

Additionally, there could be promotions and specials like **free samples** , or a **free side dish with the purchase of an entree** .

Grand Opening

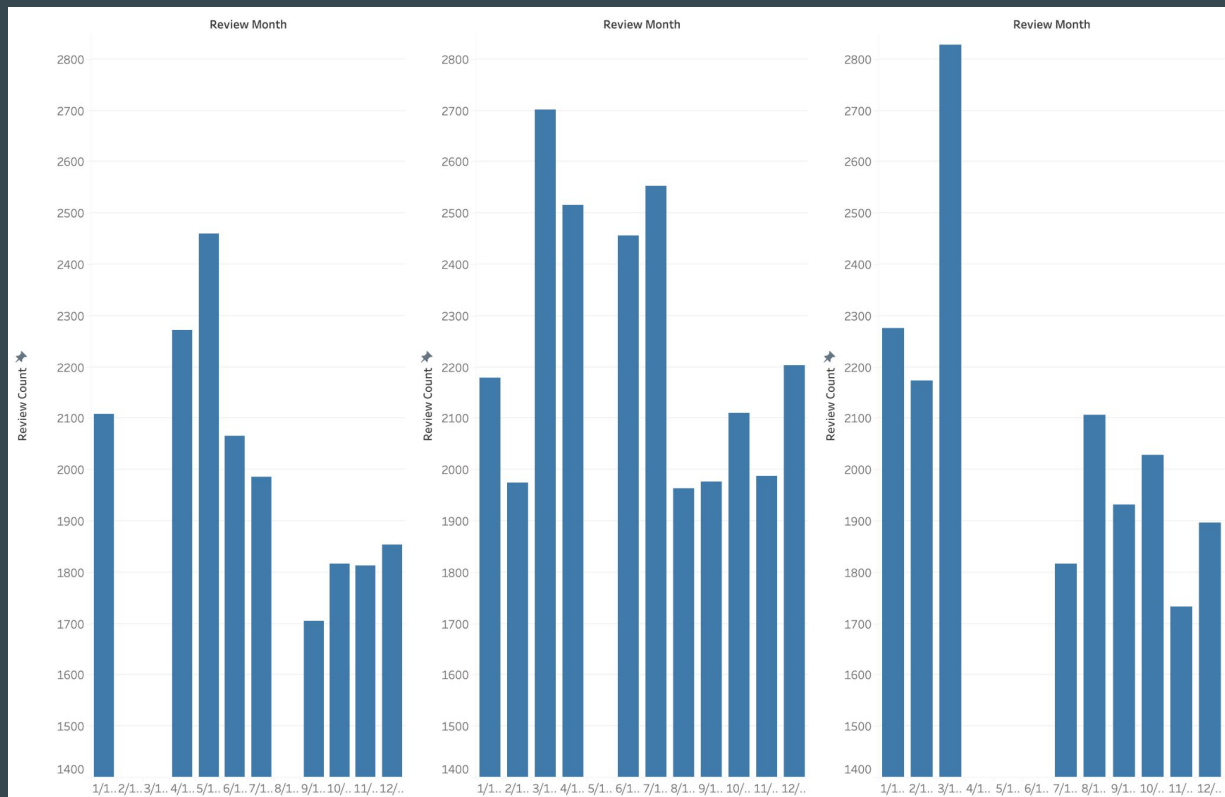

We plan to use the Jazz Festival to our advantage for the **grand opening in April** . Planning a **launch on social media** would be super beneficial as well. This is also a great time to incorporate **incentives to leave a review** .

Since the atmosphere will be lively a few weeks after the grand opening and in the thick of the Jazz Festival, **hosting local artists for live entertainment** , is a great way to give back to the community and make a lasting first impression.

The Launch

These charts display the **amount of reviews for each month** between the years 2017-2019. The charts indicate that from **March onward, there are consistently higher review numbers** compared to February, despite it being a festive month.

This upcoming year Mardi Gras will take place on March 4. Therefore, we recommend John and Jemma to soft launch the tavern-pizza bar on **February 20**. The goal is to **open prior to the celebration weeks** to **avoid an influx of people during the first opening day**. That way, the restaurant and employees can be fully prepared to expect future busy nights. This **ensures we make a stronger first impression** by having everything ready in advance before a **grand opening**.

 - tables, doors, host desk, restrooms, business cards
- Servers can make customers aware of the review promotions **at time of ordering** .

Sentiment Analysis

What should we do more of?

The pizzeria focuses on the **benefits and opportunities of opening a tavern-style pizza parlor** in the underserved part of New Orleans. While analyzing with VADER, the compound sentiment score, it shows very positive reviews. There are multiple positive phrases like "**decor**" "**ambiance**" and "**vibrant atmosphere**", that add to the positive sentiment score. The neutral sentiment comes with words like "menu," "pricing," and "service," which are used to describe the overall experience without any strong emotion.

What should we look out for?

Hang On Pizzeria has some potential challenges that could bring up negative sentiment if not handled correctly. **Competition** from nearby bars and restaurants and **standing out** in New Orleans' busy nightlife are substantial hurdles. Words in the reviews like "late-night hours" and "customer retention" point to these issues. While these negatives aren't the focus, they highlight **areas that need attention** to make the pizzeria a success
